

ICFRA TECHNICAL Rules – TR & F-class – Amended Rule

Following amended text was approved by ICFRA Council for incorporation into ICFRA TR and F-Class Rules on 1 September 2010. Delete Existing T7.5 or F7.5 as the case may be.

F/T7.5 No rifle may be loaded or fired until the CRO has given the order to load and carry on. Any RO may give an order to cease firing at any time for any safety-related reason. If any person on the range considers that there is a potential or actual breach of safety which urgently requires all competitors to stop firing he will immediately give the order “cease fire, cease fire”. All competitors must immediately stop firing, take their finger off the trigger, unload or refrain from loading (as the case may be), and await further instructions. No-one may move off the firing point. The person ordering the stop, if not himself the Range Officer (RO), must immediately explain his action to the RO so that the RO may take effective control of the situation.
